

Content Research Statement

Our goal is to conduct research on pollution in the bodies of water around the world, to be more specific I mean what a majority of the pollution is whether it be chemicals or just regular trash. We also plan on researching Coral Reefs, which animals live there because we know that coral reefs are important to the world. As for a review of everything, Our main goal is to research all of the pollution that goes on in the world related to the ocean, as well as companies that assist in cleaning the ocean.
