

PENGUIN SHOTGUN BASEBALL

Created By: Tyler Chapman, Stefan Marshall, Jo Forchheimer, Ryan Murphy
& Vedant Chaudhari

What is Penguin Shotgun Baseball?

You play as Babe Ruth's ghost trapped in a baseball. Years ago, someone threw you off a boat and the currents ended up carrying you to antarctica. There, you founded a bus company for penguins. Using a shotgun as a baseball bat, hit the penguins as far as you can so that they have to take longer and more expensive bus rides back home. Use the money to upgrade your shotgun for even more flightless bird flinging and therefore more cash. Eventually emmass enough mula to get a flight back home and become the world series game winning ball.

The Programmers

- Swing Mechanic
 - AnimationState.normalizedTime
 - Bat doesn't have a collider on it!
- Unity's UI System
 - Not very flexible
 - Definitely not designed to be used with a single button mechanic
 - Tons of technical debt
- Procedural world generation
- Buffs/Debuffs and core gameplay loop
